

TruNet Solar Program

Dear OUC Customer,

We'd like to inform you of upcoming changes to OUC's TruNet rooftop solar program that will take effect on July 1, 2025. Please review key updates below:

New Rooftop Solar Installations

June 30, 2025

New solar rooftop interconnection applications and payment must be completed and received by June 30, 2025, to be eligible for the full retail incentive rate for excess energy sold to OUC until June 30, 2045.

July 1, 2025

Beginning July 1, 2025, customers submitting new solar interconnection applications will receive energy credits at the community solar energy rate for up to five years through June 30, 2030, and then transition to the retail fuel rate afterward for energy sold to OUC.*

Existing Rooftop Solar Owners

Existing OUC rooftop solar owners will continue to receive the current, full retail incentive rate for excess energy sold to OUC until June 30, 2045. No action is needed to maintain this rate.

Thank you for supporting our efforts to promote renewable energy. We truly appreciate your continued commitment to sustainability and innovation in our community. If you have questions, please visit: [OUC.com/TruNet](https://www.ouc.com/TruNet).

**Customers will receive the Full Retail Rate during a temporary grace period through March 2026*
