The WATT SAVINGS PROJECT

A Student Art Program Sponsored by OUC

The Watts Savings Project is an energy conservation themed art initiative sponsored by OUC—The *Reliable One*, designed to teach Osceola County Students the importance of energy conversation.

The project includes a calendar contest for elementary school students where they receive a lesson on energy conservation and are then encouraged to share what they've learned through their artwork.

Since 2024, eight schools and almost 2,000 fourth and fifth graded have participated in the annual calendar contest. More than 1,000 calendars are distributed each year.

By blending environmental education with hands-on creativity, the goal of the project is to encourage

students to think critically about energy use to shape a generation of environmentally conscious adults.

Each participating school selects its top six entries for submission, and OUC employees have the honor of choosing 13 winning pieces to be featured in the annual calendar.

We invite you to enjoy this year's inspiring artwork and meaningful messages and remember that together we can **"paint a brighter future through energy conservation."**

For ways to save energy and to learn more about OUC's energy conservation programs, please visit ouc.com/waystosave.

OUR WATTS SAVINGS

Having solar panels helps save energy and produces less waste.

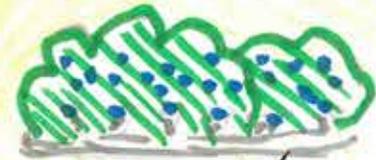

Wind farms help save energy.

Use less air conditioning and keep your house around 80 to help the environment.

OUR
The reliable ones!

A drip irrigation system helps conserve water to make sure our plants don't get too much water or too little water also it helps save water.

OUR making our world a better place.

turning off the lights helps save energy to make our world better.
